

# Autocomplete for bracket notation

By Umar Hansa

Umar is a front-end web developer

Autocomplete in the Console Panel not only works with regular dot notation (e.g. `window.onload` → `window.onload`), but also with square bracket notation e.g. `window['onload']` → `window['onload']`.

Even if you have an array, you get autocomplete for the index e.g. `arr[0]` → `arr[0]`.
