

Optimize Images

Overview

Optimized images load faster and consume less cellular data.

Note: This audit only tests JPEG images.

Recommendations

Click **View details** to see each JPEG image that can be optimized. To pass the audit, set the compression level of each image to 85 or lower.

See [Image Optimization](#) to learn more about the topic in general.

Web services like [TinyJPG](#) can help automate the process of image optimization.

More information

Lighthouse collects each JPEG image on the page, sets each image's compression level to 85, and then compares the original version with the compressed version. If the potential savings are 4KB or greater, Lighthouse includes the image in its report.
