

WebSockets updated to latest version in Chrome Canary

By Eric Bidelman

Engineer @ Google working on web tooling: Headless Chrome, Puppeteer, Lighthouse

The WebSocket API has been rev'd to the latest version (13) in Chrome Canary. The developer-facing changes are very small, but are incompatible with the older version.

Here's the scoop:

- Change the origin header name: `Sec-WebSocket-Origin` -> `Origin`
- `Sec-WebSocket-Version` header value: 8 -> 13
