

Go to a line number at a specific column

By Umar Hansa

Umar is a front-end web developer

```
9  } else if (document.body.textContent) {
10    text = function (el, v) { return v ? el
11  }
12
13  // el.addEventListener / el.attachEvent h
14  var addEvent;
15  if (window.attachEvent) {
16    addEvent = function (el, ev, cb) { el.a
17  } else if (window.addEventListener) {
18    addEvent = function (el, ev, cb, captur
19  }
20
21  // gtieX augments. so a search is matchir
22
```

{ } Line 12, Column 1

GOTO a line number with a specified column using the format **:linenumber:columnnumber** in the CMD+O dialogue from the Sources panel editor.

1. Hit CMD + O from the Sources Panel with an open file
2. Enter :5:9
3. Notice you are taken to line 5, column 9!
