

Chrome Developer Tools for Speed

By Paul Irish

Paul is a contributor to WebFundamentals

I spoke at Velocity a little bit ago and talked about the Developer Tools in Chrome to improve the speed of your apps. I covered the Task Manager, `window.performance`, `onerror` event, `console.profile()`, `console.markTimeline()` (now called `console.timeStamp()`), Timeline view, Chrome's Heap Profiler, and remote debugging. 9 minutes.

ps. chrome teleports goats. that's what i heard.
