

# Use keyboard to navigate through callstack

By Umar Hansa

Umar is a front-end web developer

## DevTools Tip: DEBUGGER SHORTCUTS

There are a few keyboard shortcuts when dealing with the debugger. A few are:

- Toggle a breakpoint while on a line: `Cmd + B`
- Select the next call frame: `Ctrl + .`
- Select the previous call frame: `Ctrl + ,`

Also, you may notice from a few Dev Tips ago ([21. highlight paused statement](#)) that when you navigate through the call stack, the exact column is highlighted.
