

The Yeoman Monthly Digest #3

By Addy Osmani

Eng Manager, Web Developer Relations

Allo! Allo! This past month saw the Yeoman community grow to 472 generators. We're excited to see so much passion for project scaffolding and are working on some new features to enable generators to extend and build on top of each other.

We'll talk more about this soon, but for now here's this month's round-up of featured articles, generators and team blogs. We hope they're useful!

From the Team blog

[Exploring A Generator For Gulp.js](#)

[Generators New Year Cleanup!](#)

[Updates To Our Grunt, Bootstrap & Other Generators](#)

[Yeoman Q1 2014 Roadmap](#) and [Roadmap For The Angular Generator](#)

[What's New In The Backbone Generator](#)

Sindre Sorhus also created [envcheck](#)  - a useful environment checker that will double-check you have everything needed to run Yeoman smoothly.

```
> envcheck

Environment check
✓ $HOME
✓ Git
✓ Yo
✓ Ruby
✓ Compass
✓ Node.js version
✓ npm version
```

Articles

This month the community have been building full-stack web apps, Hybrid apps and even a remote desktop client with Yeoman generators. We enjoyed reading:

[A Remote Desktop Client with AngularJS and Yeoman](#)

[Angular Fullstack 1.2.0 available now](#)

[Automating React With Yeoman and Grunt](#)

[Cordova + Yeoman Web Best Practices v2.0](#)

[Building a new Yeoman generator](#)

[Goodbye, Sprockets! A Grunt-based Rails Asset Pipeline](#)

[Using Yeoman along with the ng-book](#)

[Yo Polymer – A Whirlwind Tour Of Web Component Tooling](#)

[Should Yeoman Split Up It's Gruntfiles?](#)

[A Workshop On Bower, Yeoman And Flight](#)

[Samsung Smart TV app generator for Yeoman](#)

[Using Yeoman to scaffold out new websites](#)

[Announcing generator-angular-require](#) [↗](#)

[Web App with dream team; AngularJS, Cordova, Yeoman & Topcoat](#)

[Using the European npm mirror](#)

[Scaffold your projects with Yeoman...](#) [↗](#)

[Why use Yeoman?](#)

[Simple Scaffolding with the Ignite UI Yeoman Generator](#)

[Improving Your Development Workflow with Yeoman](#)

[Why you should use Yeoman](#)

[AngularJS, PhoneGap and my mobile toolset](#)

Featured Generators

This month also saw new generators released for KrakenJS, Meteor, ChaplinJS and a number of other projects. Some of our choice picks:

[Scaffold KrakenJS projects](#)

[A ChaplinJS generator](#)

[Scaffold ESLint rules](#)

[Scaffolding for Meteor projects](#)

[Scaffold Gulp plugins](#)

[Scaffold Gulp files](#)

[Scaffold KendoUI apps](#)

[Radian ~ A scalable AngularJS framework with a Yeoman generator](#) [↗](#)

[Scaffolding for Android](#)

[Scaffold Angular + Firebase apps](#)

[A generator for DocPad projects](#)

[Automating and Provisioning AWS Infrastructure for HTML5 Apps With Yeoman](#)

[A generator for mobile webapps](#)

[Scaffold slides with the Google I/O template](#)

[Simple webapp generator for Yeoman](#)

[Yeoman WordPress theme generator – kickstart a grunting SCSS theme](#)

[Scaffold Closure projects](#)

[Scaffolding for Gulp webapps](#)

[An ExpressionEngine Add-on generator](#)

[Scaffold AMD projects](#)

[Scaffold Finatra apps](#)

[Scaffold pattern libraries](#)

Finally, updates have also been made to our official [Ember.js](#), [Mobile WebApp](#) and [Karma](#) generators. Changelogs for all of them will be landing soon.

Until next time

If you've written an article, given a talk or created a generator you think would be useful to others, please feel free to share it with us on [Twitter](#) or [Google+](#). We're always interested in seeing how our tools are used.

Until the next time we run `yo digest`, happy scaffolding and don't be afraid - Yeoman is here to help, not replace you :D

I'm genuinely scared that one day I'm going to be replaced by a [@yeoman](#) generator.

– I Am Devloper (@iamdevloper) [February 7, 2014](#)

With thanks for the rest of the Yeoman team for their reviews
