

# Expand CSS shorthand properties

By Umar Hansa

Umar is a front-end web developer

In the styles pane, you can expand CSS shorthand properties like **flex** or **padding** and see the full range of properties which are defined for you. E.g.

```
flex: 0 0 45%;
```

Translates to:

```
flex-grow: 0;  
flex-shrink: 0;  
flex-basis: 45%;
```

Just click the small arrow near the shorthand property to expand it.
