

Websocket Frame Inspection now in Chrome DevTools

By Paul Irish

Paul is a contributor to WebFundamentals

While before we could see sockets being established, we haven't had inspection ability into the data going over the wire in websockets. Thanks to a [WebKit patch](#) from RIM, we can now see the frame data, along with small unicode arrows indicating which direction the data is going.

Open up your [Chrome Canary](#) or a [fresh Chromium build](#) for the latest changes here.
