HTML5 Libraries/polyfills - Mid July

By Eric Bidelman

Engineer @ Google working on web tooling: Headless Chrome, Puppeteer, Lighthouse

More awesome libraries popping up all over the place:

- SmokeJS ↗ - A framework-agnostic styled alert system for javascript.
- Buzz - Buzz is a small but powerful JavaScript library that allows you to easily take advantage of the new HTML5 audio element. It degrades gracefully on non-modern browsers.
- FileSaver.js - polyfill for the FileSaver's `window.saveAs()` API. Save blobs/files, client-side.
- BlobBuilder.js - BlobBuilder API polyfill.
- canvas-toBlob.js - Polyfill for HTML5 canvas's `toBlob()` method, which is not implemented by any browsers.
